Skills

I'm a software engineer with 5+ years experience currently focusing on front-end development. I'm good at TypeScript/JavaScript and Python. I also learned Go, C and Rust as an experiment project.

Experience

2022 - PRESENT

GNU/Weeb Community, Indonesia – *Software Engineer*

- Building an email notifier Telegram & Discord bot listening to a new email coming from lore.kernel.org and will be sent to Telegram & Discord.
- Building a landing page for the community which can be viewed at www.gnuweeb.org.
- Refining the email account management website for a better UI/UX.

OCTOBER 2023 - PRESENT

Universitas Terbuka, Tangerang Indonesia – *Vue Frontend Developer*

- Building a HRIS website to manage internal employees using VueJS.
- Collaborate with other teams from different divisions.
- Helping Tax division to build a tax management website for 3 months using NextJS.

Education

2016 - 2019

SMK Bhakti Anindya, Tangerang Indonesia – *Computer & Network Engineering*

I've learned how to crimping a LAN cable, blocking access to some website using MikroTik and WinBox software, installing Debian using VirtualBox VM, learning MySQL to build a library app.

2026 - PRESENT

Universitas Siber Asia, Indonesia – *Informatics*

This university has good enough lesson subjects, especially Calculus and Statistics Probability. I learned a lot from the lesson that the lecturer gave me.

Awards

- Achieved a Microsoft Certified Azure Data Fundamental.
- Achieved Mobile Development using Kotlin certification by Skill Academy Ruangguru.
